Unique Features of the Aten "Black Gold" Coin

- AML & KYC: Aten Coin is the first cryptocurrency that is designed to fulfill AML and Know Your Customer (KYC) requirements.
- **Theft-Resistant:** Bitcoin as well as other cryptocurrencies are susceptible to stealing by hackers, who are unidentifiable. However, Aten Coin is the first cryptocurrency that allows the tracing of real identities in the event theft occurs. This makes Aten Coin theft-resistant.
- Non-volatile Value & Liquidity: Volatile value is one of the key issues of Bitcoin
 and many other cryptocurrencies. In view of this, NAC's partner company, BGC
 International, Inc., is creating a constant demand of Aten Coins through joint venture
 with oil and gas production companies on oil and gas well investments. Over 50% of
 the investment profits will be paid in Aten Coin to create a continuous demand of
 Aten Coin and maintain a stable value of Aten Coin.
- Fast: Transaction of Aten Coin is 9.4 times faster than Bitcoin.
- Secure: Aten Coin is a highly secure cryptocurrency that uses multiple rounds of 11 different cryptographic hashes, thus making it one of the safest and sophisticated modern cryptocurrencies. In contrast, Bitcoin only uses a single round of double SHA-256 hashes.
- **Usability:** Shops can easily accept Aten Coin payment by using our AtenPay services. In the near future, people will be able to use the Aten Coin to buy things in real life, e.g., a cup of coffee, online games, meat, petroleum, etc.

Ken Lo, CEO and Co-founder of ANXPRO, is looking forward to offering the Aten "Black Gold" Coin on his company's trading platform. Lo said NAC's commitment to compliance and transparency created a "no-brainer" partnership between the two organizations.

"NAC and ANXPro operate from the same level of respect for regulatory practices in the electronic currency market," said Lo. "We both utilize topnotch security methods, and employ the most state-of-the-art anti-money laundering control systems available today," said Lo.
